**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 17, 21, 22 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2002/0069962 (Maxwell et al.).

Maxwell discloses a method of producing a hollow core composite assembly comprising applying a film adhesive to an open core surface of a hollow core base; and applying an uncured solid film to the open core surface (see paragraph 0078); and applying at least one liquid resin layer to the uncured solid film using a resin molding process, the at least one solid film preventing the liquid resin layer from penetrating the hollow core base (see paragraph 0120). In the method disclosed by Maxwell, the step of applying at least one liquid resin layer is accomplished using a vacuum assisted resin transfer molding process (see paragraph 0089). The uncured solid film in the reference also comprises a thermoplastic material (see paragraph 0078), as recited in claim 26.

*Allowable Subject Matter*

3. Claims 18, 19, 23-25, 27 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not disclose or suggest the claimed method of producing a hollow core composite assembly. The most relevant prior art of record is US 2002/0069962 (Maxwell et al.), which discloses a method of producing a hollow core composite assembly comprising applying a film adhesive to an open core surface of a hollow core base and applying an uncured solid film to the open core surface, the at least one solid film preventing the at least one liquid resin layer from penetrating the hollow core base; however, the reference does not disclose that the assembly further includes at least one dry face ply or outer film adhesive on top of the solid film, or that the uncured solid film comprise polyetherketoneketone, polysulphone, polythethyleneterephthalate, nylon, thermoset, or urethane film materials.

*Conclusion*

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1775

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wendy Boss whose telephone number is 703-306-5922. The examiner can normally be reached on M-Th 8:30a-6:00p; 2nd F 8:30a-5:00p.
